Latest Revolution From Lamelle Research Laboratories Sets A New Standard In Anti-Ageing Skincare Technology

By harnessing the power of an exclusive DNA damage-correcting enzyme, that accelerates the **REPAIR** and **PREVENTION** of damage inflicted to the control center of the skin – the DNA, Lamelle Research Laboratories has set a new standard in the form of their latest feat **NOURISH**. Never before has a product or range been available with the unique ability to enter damaged skin cells and directly **REPAIR DNA** injury, re-establish normal cell function and **PREVENT** further damage. In essence, a true revolution in anti-ageing has begun.

Ageing of the skin begins at the moment of birth. Gradual changes in the structure and functioning of the skin accumulate over time driven by both the pre-determined speed of decline via genetics and accelerated by the harsh environment that we live in.

Noted from as early as 18 years of age, the first signs of premature ageing include fine lines, poor texture, photo-ageing caused by UV radiation and DNA damage brought on by exposure to the elements and general environmental influences, oxidative stress and free radical damage.

“To date skin care ranges have focused on the protect element as it relates to these elements of ageing, however the **REPAIRING of DNA** damage, remained an un-addressed element of accelerated skin ageing. It is this element that we have focused our efforts on and has lead us to this revolutionary solution that will make anti-ageing far more effective and thorough than ever before. This significant leap in anti-ageing dermatology that defines our **NOURISH** range.” Says Dr. Bradley Wagemaker, Medical Director Lamelle Research Laboratories.

What is the Nourish Range:

The Nourish Range is a revolutionary anti-ageing skin care program from Lamelle Research Laboratories which offers both DNA damage PREVENTION and REPAIR.

Nourish offers multi-faceted skincare formulas which provide intensive doses of anti-ageing benefits to the skin reducing the appearance of fine lines and wrinkles and protecting the skin from environmental insults which include UV damage resulting in indirect oxidative DNA alteration

Prevent:

Anti-oxidants in the form of Vitamin C and E as well as Astaxanthin assist in the prevention of scavenging of these reactive oxygen species (ROS) formed within the skin. These anti-oxidants are NOT capable of correcting any of the DNA dimers once they are formed.

Repair:

Nourish contains an exclusive DNA-damage-correcting enzyme that will accelerate the **REPAIR and CORRECTION** of oxidative DNA dimers (8-oxo-G dimers). This mechanism

of oxidative DNA correction is unique to the NEW Nourish range. This innovative enzyme in the NEW Nourish range reduces 8-oxo-G levels by 94% after 6 hours compared to untreated cells.

Nourish has been created to address every aspect of skin ageing. Essential multi-vitamin blends, extremely powerful anti-oxidants, advanced hydration complexes, anti-inflammatory herb blends, luxurious skin emollients and DNA repair enzymes make the new Nourish skin care program from Lamelle Research Laboratories unrivalled in what it can offer in an anti-ageing skincare program.

NOURISH in a nutshell:

- Nourish is a category leading anti-aging skincare range
- First anti-ageing skin care range to target DNA damage
- The only skincare range to **REPAIR and PREVENT DNA** damage
- Innovative DNA enzymes – capable of entering damaged skin cells and repairing DNA
- Returns normal cell functioning to damaged cells

Nourish Revitalise Cream – 50ml

The pinnacle of anti-ageing skincare research, **Nourish Revitalise Cream** re-writes the level to which skin cells are cared for. A comprehensive multi-functioning formulation, **Nourish Revitalise Cream** deeply nourishes skin, protecting and aggressively correcting cell damage at a DNA level to provide the ultimate anti-ageing skincare experience.

Nourish Daily Cleanse – 50ml

Nourish Daily Cleanse is a soap-free foaming cleanser, which deep cleanses pores for a thoroughly smooth and refreshed skin. Marula and grape seed extract are perfect accompaniment to refresh the skin and support anti-oxidant defences.

Nourish Revitalise eye – 15ml

Premium anti-ageing eye care that also reduces eye puffiness and congestion. **Nourish Revitalise Eye** helps contour and firm the eye skin, making fine lines less noticeable and eyes brighter. Built into a luxuriously smooth cream base, the Baobab and Grape seed oils infuse the eye skin with anti-oxidants and natural oils, while anti-congestion peptides help keep eye skin free from tiring bags under the eyes.

Nourish Revitalise Lite – 50ml

A comprehensive multi-functioning formulation, **Nourish Revitalise Lite** deeply penetrates into the skin, protecting and aggressively correcting cell damage at a DNA level to provide the ultimate anti-ageing skincare experience. **Nourish Revitalise Lite** is perfectly crafted for combination to oilier skin types.

Nourish Rescue Repair Gel – 100ml

Rescue Repair Gel is intended to rescue skin that has been exposed to the sun or after treatment with IPL. The powerful anti-inflammatory, anti-oxidant and cooling agents in the product goes to work to rapidly reduce the extent of the injury. This product is not a substitute for adequate sun protection treatment.

Nourish Multi-Active Sun 30 – 70ml

To maximally protect skin from both UV radiation and free radicals, modern day sun protection must fulfil a wide range of functions. Multi-active sun 30 is a broad spectrum organic sunscreen product that has been significantly enhanced by high levels of the powerful antioxidant **Pycnogenol**,TM to thoroughly soak up excess free radicals. **Multi-active sun 30**, a thoroughly researched solution to skin protection.
