## Line Lift

**Now the doctors who launched the Alpha Hydroxy Acid revolution introduce Aminofil a new patented anti-ageing breakthrough.**

This innovative SynerG System 13.0 two-step treatment is formulated with patented Aminofil technology to synergistically build skin's natural volume and visibly reduce the appearance of deep lines and wrinkles (such as scowl lines, furrows, crow's feet and smile lines) resulting from repetitive facial expressions and UV damage. This two-step treatment targets these deep expression lines that may not respond to an anti-ageing skincare regimen alone. It volumises the deep skin matrix, helping to activate collagen and hyaluronic acid, skin's natural fillers. As a result deep lines appear filled and lifted for a refreshed, younger appearance.
